Building a coherent response for a sustainable post-COVID-19 recovery

The world is facing an unprecedented multidimensional crisis that demands coherent policy responses. The COVID-19 crisis has further highlighted the vulnerability of several of our basic systems, including healthcare, social protection, education, value chains, production networks, financial markets, mass transit systems and ecosystems.

This brief aims to present a policy coherence roadmap, which can support governments in strengthening mechanisms for ensuring a sustainable recovery from the COVID-19 crisis that does not come at the expense of progress towards the Sustainable Development Goals (SDGs).

Consult the brief at: https://read.oecd-ilibrary.org/view/?ref=376_376369-eayqu00bfg&title=Building-a-coherent-response-for-a-sustainable-post-COVID-19-recovery

RISKS PREVENTION

Ministry of Health

The proper use of the face mask and maintaining the #HealthyDistance, reduces the probability of catching #COVID19.

In crowded places where it is difficult to maintain the #HealthyDistance, use the face mask, do not forget to wash your hands frequently and use the sneeze etiquette.

Don't forget to wash your hands frequently and use the sneeze Etiquette.

The epidemic is not over, prevention continues.
